

EVERROCKET

WHITEPAPER

INTRODUCING EVERROCKET

NEVER SEE TWO SELLS IN A ROW

Based on the revolutionary EverRise protocol, **EverRocket \$EVR** is a hyper-deflationary token launching on Binance Smart Chain, tradable on PancakeSwap. In short, EverRocket token holders are not only rewarded through static rewards but also through **true automatic buy-back burns** every trade from within the liquidity pool.

As part of Buy-Back process, contract takes care of buying back some of the tokens and burn them whenever a sell happens. In a nutshell, 98% of the time, you will not see 2 sell transactions at any time and there will never be three sell transactions continuously at any time.

TAXES

A total of 9% transaction fee is collected when buying or selling \$EVR tokens. The taxes are used for the following purposes:

2%

HOLDER REWARDS

1%

MARKETING TAX

6%

BUY-BACK ENGINE

TOKENOMICS

The total supply of \$EVR is **1,000,000,000,000,000** tokens. Thanks to the hyper-inflationary nature of the token contract, the circulating supply can only be gradually reduced.

84%

CIRCULATION

5%

DEFLATIONARY
BLACKHOLE

A rocket is shown launching vertically, angled slightly to the right. The rocket is dark in color, possibly black or dark blue, and is positioned in the upper half of the frame. The background is a soft, hazy sunset or sunrise sky with warm tones of orange, yellow, and light blue. The overall image has a semi-transparent dark overlay to make the white text stand out.

COMING SOON...

INTELLIGENT TRADING UTILITIES

The EverRocket token \$EVR will be the governance and utility token in the EverRocket ecosystem. Right now, we are working on two projects that both require \$EVR tokens to function.

Pancake Rocketeer - a price alert/stop/limit order bot, which holders can interact with both on our web app and in Telegram.

Big Falcon Rocket - an intelligent sniper bot for both IDO presale and fairlaunch listings. There will also be a channel where our NLP bot scrapes and analyzes the latest upcoming project launches from various sources. \$EVR holders are allowed to subscribe to it to automate the sniping workflow.

ROADMAP

Phase 1
Q3 2021

- **Token launch on DxSale**
- **Project website**
- **Marketing push and onboard influencers**
- **Token Audits**
- **CoinGecko + CoinMarketCap listing**

Phase 2
Q3-Q4 2021

- **Pancake Rocketeer stop/limit bot**
- **Big Falcon Rocket IDO sniper**
- **Listing on Tier-2 Exchanges**

Beyond **TBD...**
